Graph Editor Build and Run Guide

<u>Step 1:</u> Download the project from github.

<u>Step 2:</u> Open a terminal and change the current working directory to the local project.

<u>Step 3:</u> Build the project with the command **ant do-deploy**. Once you build the project, a jar file with the name of the project **XMLtoGraph.jar** and a folder **libs** with all the libraries needed should appear on the folder **dist** in the project.

NB: Ant has to be installed. Otherwise, install it with the command **sudo apt-get install ant**.

<u>Step 4:</u> Change the current working directory on the terminal to the folder dist.

<u>Step 5:</u> Run the project with the command **java -jar --module-path libs -add modules=javafx.controls,javafx.fxml XMLtoGraph.jar**

<u>Step 6:</u> Refer to the Graph Editor User Guide PDF to use the Graph Editor app.
